

The **RCI Custom Products EB-KMK Series Box Covers** provides a professional enclosure/cover for use with standard Hoffman NEMA sized recessed electrical boxes. EB-KMK series covers provide the perfect solution when security and controlled access to connectors and other devices is desired. Effectively utilized in venues such as convention centers, casinos, ballrooms, press rooms, stadiums, and houses of worship.

Created in collaboration with KMK Technologies, this new EB insert is designed to provide a professional housing for AV and Broadcast connectivity using readily available Hoffman electrical boxes. Made with durable yet lightweight .093 aluminum, and fits perfectly inside Hoffman Electrical Boxes (ASE-ASG series listed below NOT INCLUDED), providing space for proprietary 15.75" rack panels, or a single one piece panel, all of which can be configured with any type of fiber or copper connectivity. The locking front door panel is spring hinged for easy installation and removal and provides a cutaway bottom for cable egress. Comes standard with Black Matte Powder Coat finish, but always available in custom finishes

FEATURES

- Rugged .093 aluminum construction
- Easily installed in Hoffman wall boxes (ASE-ASG series, purchased separately)
- Durable spring-loaded hinges
- Rack Rail panel mounting (12"x8"x6" provided with turned flange in place of rack rail)
- Cylinder Lock with two keys
- 3.625" useable space inside cover
- 2" trim flange to finish installation (1" on all sides)
- Black or White Matte Finish Powder Coat standard finish. Custom colors available.

Note: Replace suffix "xx" with powder coat paint finish, "PW" Powder Coat White, or "PBSM" Powder Coat Black Smooth Matte
