The RCI Custom Products **MI Series** Modular Wall Plate Inserts are designed to provide a convenient and reliable connectivity option while maintaining an aesthetically pleasing appearance in any commercial or consumer installation. **MI Series Inserts** are both rugged and durable, and will not crack or break like most available plastic modular inserts.

Each high grade aluminum assembly is individually milled on both the front and back sides of the unit to ensure a proper, clean fit when trimmed out with a modular style wall plate. The **MI Series Inserts** durable construction also provides for more usable area at the rear of the insert, allowing maximum connector mounting area on the front. The inserts are finished with either anodized black or clear, or powder coat finished in white, ivory, or black texture.
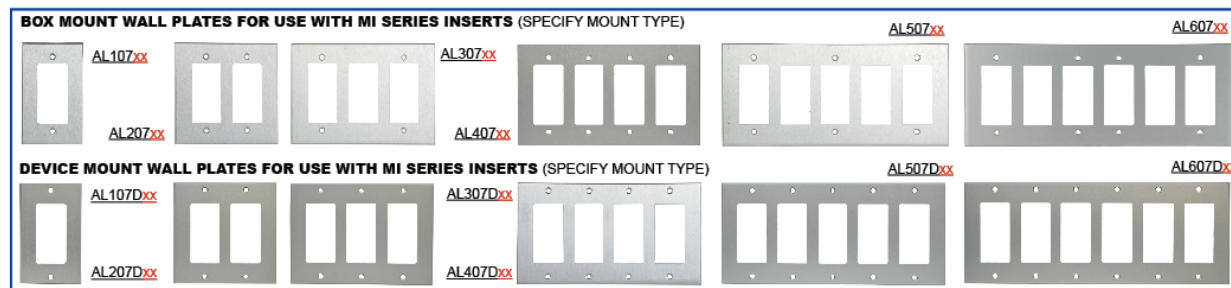

MI Series modular wall inserts are shipped with connectors of choice installed, custom engraving included.
