

**FEATURES**

- Offered in 1, 2, and 3 RU sizes
- .090 Aluminum, Black Textured powder coat finish
- 2.5" wide integrated cable harnessing tray
- One piece formed assembly
- Harnessing tray is pre-punched with 2 rows of oblong holes spaced to accept tie wraps and other securing methods
- Panel may be configured with holes and connectors to complete the assembly

The RCI Custom Products **RP Series Lacing Panels** integrates professional audio and video connectivity with cable management and lacing in a compact, efficient, and economical package. Fabricated from .090 aluminum, the units are shipped in a durable Black Textured powder coat finish.

The 2.5" wide cable lacing tray is pre-punched with 2 rows of oblong holes to accept commonly used plastic ties wraps, Velcro straps and other suitable cable management products.

Simply specify the connectors and engraving necessary to complete the assembly, or use the RP Series Lacing Panel without connectors to professionally secure and route cables and wiring within any equipment rack.
