- Attractive powder coat black finish
- Made in the USA

The RCI Custom Products **RLP615 Rack Mount Work Light** provides a functional solution for rack illumination, power distribution, and product branding. Using only one rack space, the RLP615 utilizes a powerful variable segmented LED assembly to provide dimmable front side rack illumination. The rear panel provides 6 vertically oriented AC outlets that are separate from the work light, and switchable from the front panel. Customize the RLP615 work light assembly by having your company name and logo or other project identifying information printed on a translucent replaceable membrane panel loaded at the front of the light hood. Standard with attractive black powder coat finish.

## A & E SPECIFICATION

*The rack mount work light shall be the RCI Custom Products Model RLP615. Unit shall be 1.75" tall and conform to standard EIA 19" rack mounting. Assembly shall be made of powder coat black aluminum and be complete with aluminum lamp hood, cool operating LED assembly. Unit shall include six (6) switchable grounded AC outlets on the rear and front mounted circuit breaker and dimmer.*
