

The SA Series Panel Line has been created to withstand the rigors of true live broadcast use in one of the most difficult environments in Professional AV - Stadiums and Arenas. The SA Series is made for continual and repeated use, utilizing .093 Black Anodize or PowderCoat Aluminum, turned flange edges for rigidity, and welded corners and edges where required. Mil Spec engraving with contrasting backfill ensures your panels will outlast the system. Available in Stainless Steel at additional cost.
